

# The Town of Lake Lure

## Possible Entrance Sign and Gateway

### Concept 3

These Concepts and ideas as shown are an interpretation of meshing the historic Mediterranean style of Lake Lure with the rustic, mountain, and craftsman architectural style that is predominately built in Lake Lure today.

The intent of these concepts are to offer some ideas to engage the Town of Lake Lure to get a pulse in the overall theme and direction to create a front door and lasting impression for the town.

Other ideas could result in going with a uniform style that speaks predominately to the rustic craftsman style, or mountain lake style as defined in the Design Guidelines for Lake Lure.
